PROFILE SUMMARY

I am a Computer Science undergraduate at Madras Christian College with a passion for software development, cybersecurity, and emerging technologies. I enjoy building real-world applications and continuously improving my skills through internships, hackathons, and hands-on projects.

I have experience with C++, Python, HTML, CSS, JavaScript, MySQL, Git, GitHub, React, Next.js, Node.js, PostgreSQL, and Redis. I enjoy working across the full development stack, from designing user interfaces to building backend systems and workflow automation.

Alongside software development, I actively explore ethical hacking, networking, and Linux through platforms like TryHackMe and Hack The Box. I also have a keen interest in AI, IoT, robotics, blockchain, and cloud technologies, and I enjoy learning how these technologies can solve real-world problems.

I believe in learning by building. Whether it's developing scalable applications, debugging complex systems, or collaborating on innovative projects, I am always eager to take on new challenges and grow as an engineer while creating technology that makes a meaningful impact.

PROFESSIONAL SKILLS

Python	**Project Management**

WORK EXPERIENCE

Pentesting intern

Pentagon | Chennai

Jan 2026 - Present

I do web pentesting and find vulnerabilities in websites. I have a good at Networking fundamentals.
